Resume

I am a junior developer with interest in both Front-End and Back-End development. My projects' toolset revolves around the Javascript ecosystem, but I am willing to expand my knowledge into any other programming language. I believe that every concept is understandable if you research thoroughly enough, that is why I also develop a [blog](#) to cement my own knowledge and share it with others.

Projects

[Airbnb clone](#)

[Github repo](#)

A full-stack application developed via Typescript, Next.js, React and Tailwind. For the database I have relied on Prisma and MongoDB. Additional features include state management - Zustand, authentication - Next-Auth, Bcrypt and HTTP request handling - Axios.

[Tilia & Ixora](#)

[Github repo](#) – Tilia [Github repo](#) - Ixora

Static websites promoting the sale of apartments done as a freelance work. I have used React and Javascript based on Next.js as a framework. The stylization was achieved via Tailwind and custom CSS set in global.css and for some advanced animations I have relied on Framer Motion.

[VGV Chat](#)

[Github repo](#)

A Create React App website for real-time messaging developed via React, Javascript, SASS and Firebase. I also applied some basic unit testing via Cypress.

Education

- **Master Of Laws (LL.M.)** - First Class Mark

Humboldt University Berlin

Master's thesis - 'The Private Law and Risk Elements of Digitalisation of Payment Services (FinTech, DLT, Cryptocurrencies).
