# **VASIL VASILEV**

## Resume

My current knowledge revolves mainly around the Javascript ecosystem, but I am eager to expand it depending on the business requirements. I also keep up a <u>blog</u> where I try to explain the more difficult concepts I encounter.

# **Projects**

## Airbnb clone

Github repo

A full-stack application developed via Typescript, Next.js, React and Tailwind. For the database I have relied on Prisma and MongoDB. Additional features include state management - Zustand, authentication - Next-Auth, Brypt and HTTP request handling - Axios.

## Tilia & Ixora

<u>Github repo</u> – Tilia <u>Github repo</u> - Ixora

Static websites promoting the sale of apartments done as a freelance work. I have used React and Javascript based on Next.js as a framework. The stylization was achieved via Tailwind and custom CSS set in global.css and for some advanced animations I have relied on Framer Motion.

VGV Chat Github repo

A Create React App website for real-time messaging developed via React, Javascript, SASS and Firebase. I also applied some basic unit testing via Cypress.

# **Education**

• Master Of Laws (LL.M.) - First Class Mark

#### **Humboldt University Berlin**

Master's thesis - 'The Private Law and Risk Elements of Digitalisation of Payment Services (FinTech, DLT, Cryptocurrencies).

• English Law & German Law - Honorary degree

#### **King's College London**

I specialized in Banking, Financial Order, European Corporate and Capital Markets Law.

• 91 German Language High School Sofia – grade 6.00
